

TAMPERTECH Teaches: What is surface printing?

Tamper evident tapes and labels can have custom printing on the surface of the product:

Surface printing:

this is when a message or image is printed on the very top surface of the product so that it stays with the film when voided.

this printing can be anything from a barcode or numbers to a businesses logo or any other shape or pattern you can think of, totally customisable.

Because of this we are able to make them fit with a businesses corporate colours and designs offering a fully customisable, additional layer of security.

If you have any other questions about our surface printing do get in touch!
