

# TAMPERTECH Teaches: What is a Permanent Void?

**Tamper evident tapes and labels can have a range of different void styles one of which is permanent.**

So, what is a permanent void?

This is when our labels or tapes are voided from tampering or removal of the product a void message is left behind on the surface of whatever it has been stuck too.

Permanent void products can also offer surface and sub-surface printing offering total customisation with the ability to leave your logo behind when our products have been removed.

**If you have any other questions about our permanent void's do get in touch!**
