

# IT PROTECTION

## PROTECTING YOUR DATA

### TAMPER EVIDENT • TAPES & LABELS

## Applications

Non-residue security labels are used to secure USB ports and disc drives protecting businesses, immediately, against the threat of a virus attack or unauthorized data exchange. This threat has been heightened with the growth of BYOD (bring your own device) into the workplace.

Tamper evident labels are providing IT protection against piracy and privacy for businesses TODAY!

The security seals can be permanent as well as non-residue and can be applied to cd and DVD cases, computer cabinets and over USB ports and disc drives. Permanent residue labels and tape can be used for the protection of data and intelligence in transit and storage in data centers.

The applications being used today include smart phone security with a non-residue tamper evident label covering the front and back camera.

## Benefits

Adding an instant extra level of security with tamper evident tapes and self-adhesive security seals provides a clear, visual indication of tampering. The tamper evident solutions from Tampertech can help validate warranty items, reduce shrinkage and protect company data, quickly.

Low cost, simple security solution which fits into existing systems, ensuring additional safety to your security program.

## Flexible

Can be applied to different surfaces from cardboard, wood through to plastic

## Instant Layer of Security

Sticks immediately giving you an additional layer of security

## Individual Options

Sequential numbers, barcodes, QR codes, logos, language

## Simple, Secure Solution

Machine or manually applied

## Approved

Complies with ISO 17712, C-TPAT, OSHA and FDA standards
