

PHARMACEUTICAL PACKAGING INTEGRITY

TAMPER EVIDENT • TAPES & LABELS

Applications

Packaging is a critical tool to ensure pharmaceutical product safety. Using tamper evident tapes on your products and packaging helps prevent theft or diversion, or the introduction of counterfeit products into your supply chain.

Voiding tamper evident tapes and labels are used for quick, simple, visual authentication on products, packaging as well as pallets.

Tamper Technologies manufactures security solutions that can be applied to cardboard, coated card, metal, plastic, polyethylene, glass and painted metal through a selection different films and adhesives.

Benefits

Protects your brand and your business through securing the integrity and safety of your products, preventing pilferage and counterfeiting.

The permanent, non-removable OPENED VOID message on the application surface gives an additional level of security, simply, instantly (within 60 seconds) and cost effectively. This will comply with the EU FMD (Falsified Medicines Directive), effective February 2019.

The overt use of tamper evident tapes adds to the consumer's confidence in your product and brand by alerting them to the risk that the product may have been tampered with or replaced.

Flexible

Can be applied to different surfaces from cardboard, wood through to plastic

Instant Layer of Security

Sticks immediately giving you an additional layer of security

Individual Options

Sequential numbers, barcodes, QR codes, logos, language, roll lengths

Simple, Secure Solution

Machine or manually applied

Approved

Complies with ISO 17712, C-TPAT, OSHA and FDA standards, TSA -CCSP/CCSF, FMD Compliant
