

# TAMPERTECH Teaches:

## Non-Residue Product Codes

<b>X22</b>	Is our standard Non-Residue Label which is designed to not damage any surface it is applied to.	
<b>X22FU</b>	Is a more specialist version of X22 which has additional features to highlight what it has been attacked with; security cuts, reacts to solvent and heat in different ways	
<b>H22</b>	Is a highly sensitive version of X22 which is able to stick to a wider range of surfaces	
<b>X2005</b>	This is our non residue range with outline void, designed to be applied to high surface energy materials like car doors and fuel pumps as it will not leave any residue behind when removed	
<b>X22GUV</b>	This is our clear non residue gloss labels with UV ink making them glow under blacklight, making it easier to check covert security labels for tampering.	
<b>X22G</b>	Is our Non residue clear gloss labels designed for covert security which will not damage the surface they are applied to whilst offering the security of tamper evidence.
