FACESHIELD

Applications

The FACESHIELD is manufactured by Tamper Technologies in the UK. This single use clear face shield is designed for comfort and ease to keep individuals safe.

These FACESHIELDS are lighter than other shields on the market making it comfier to wear and less claustrophobic. The total transparency delivers a more normal human interaction which have proven invaluable for Mental Health Hospitals, Care Homes, Schools, Public Services, Police and Prison Officers a well as individuals travelling on public transport or working in public places.

The FACESHIELD is supplied on rolls of 500 with perforations between each shield for easy use. 500 straps and 1000 labels all supplied in one the box to ensure a good fit for all individuals. Shipping and storage is simple and cost effective.
