TAMPERTECH Teaches:
What is a Security Cut?

A Security Cut is where specially designed to self destruct when tampered with.

So why use a security cut?

- It offers a clear visible indication if it has been tampered with

- it cannot be reattached once broken

- Ideal for sealing rooms for security guards

- Can be used to seal computer ports

- Can be used to seal draws and cupboards

With this feature tamper evident labels are extremely versatile from protecting buildings and IT
