

TAMPERTECH Teaches:

What is Holographic Print?

Tamper evident labels can be customised in multiple ways to make them more identifiable, unique and harder to copy.

One way we do this at Tamper-tech is through the use of holographic print on the labels.

This additional layer of security is overprinted on the label making them easier to spot during quick checks and more identifiable and brand specific through customisation of what the hologram looks like.

If you have any questions about our holographic option do get in touch!
