

# TAMPERTECH Teaches:

## What is a Dual Number Tab (DNT)?

**Tamper evident labels can come with Dual Number Tabs, which make it easier to assign a label to a tracking number and then trace the package**

So, why use a DNT?

One way of using TaperTech's DNT is when a number sequence is replicated on the tab ensuring that the right label can be assigned to a box, eliminating the risk misreading or miswriting the number sequence on the label when noting what it has been assigned to, like in the photo where each label has been assigned to a specific shipment making sure that the paper-trail of the shipment is secure.

This is reinforced by the fact that the DNT itself voids, so it cannot be replaced or swapped once it is applied. Adding security!

**If you have any questions about you could use out DNT's the don't hesitate to get in touch!**
