

TAMPERTECH Teaches:

What is a Hybrid Tape or Label?

A Void is a key part of tamper evidence, it is the message or pattern revealed when the label is removed

So what is a Hybrid Void?

- A hybrid void is one that leaves a message on the surface it is stuck too
- Can be easily rubbed off so that the surface is left clean and undamaged.
- Can be used to secure doors, draws etc. without causing permanent damage.

Any of these Void styles can be completely customised to say or show anything that you want from logos and wording to QR and barcodes, anything you need can be shown here

If you have any other questions about our hybrid range get in touch!
