

TAMPERTECH Teaches:

What is self wound tape?

Tamper evident tape has two options for how it is made either with a liner or self wound

At TamperTech we specialise in self wound tapes as it has many benefits over tapes on film:

- It produces less waste
- it makes it more efficient to ship due to being able to fit more tamper evident tape per roll
- makes it easier to apply tape by hand and through machines

Self wound tape is able to do this thanks to a specialist coating on the surface of the film that stops tape sticking to it self!

If you have any other questions about our self wound tape do get in touch!
