What end users say about our products?

“

It Really works!

"From protecting the authenticity of our high value home tech gadgets during shipping, with their paper based tamper-evident label solution, to ensuring pallets are not tampered with, these solutions have our back. The commitment to excellence and methods for innovative solutions along with our packing supplier has been amazing for us to lean on.

TamperTechs Solutions have truly levelled up our game in the consumer electronics industry, we've added an extra layer of security to our products at different stages of our supply chain."

Dom, Risk Manager (Consumer Electronics)

“

TamperShield stopped used returns

"The tamper-evident solutions are not just top quality but the total authenticity is undeniable, they made an impact overnight for us. From protecting our deliveries with paper security tape, to using the TamperShield to stop used returns (wardrobing) – they've got it all. The team's technical support has been amazing, making it super quick for us to integrate, and they genuinely care about making sure we get the best security solutions. If you're serious about safeguarding your products, TamperTech is the way to go!"

Paul, Logistics and Shipping Manager (E-commerce)

“

SAVED US £££'s!

"Tamper Technologies has played a pivotal role in safeguarding the freshness and quality of our specialist food and beverage products. Their tamper-evident solutions have provided an effective barrier against unauthorised access, which we were really struggling with previously due to the high value nature of our products. Ensuring that our goods reach consumers in the same pristine condition as when they left our facilities, has really supported us during tough market conditions and literally saved us tens of thousands."

John, Profit Protection (Food and Beverage)
